### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 6-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Garshelis  
US Patent No. 6,145,387.

Regarding claims 1, 3, 7, 11, 14, 16, 17, Garshelis discloses a collarless circularly magnetized torque transducer with features of the claimed invention including a shaft comprising magnetostrictive material, a pair of opposite permanent magnet poles defining an axis that is aligned tangentially to a circumferential surface of the shaft and a torque-sensing flux detector positioned to detect a component of the magnetic field which escapes from the magnetostrictive material when the shaft is torqued. (This arrangement is clearly shown at the right side of figure 3).

Regarding claims 2, 12, 15, and 18, Garshelis show a pair of detector.

Regarding claim 6, the shaft is hollow (see figure 1b).

Regarding claims 8-9, the shaft comprises a main body of non-magnetostrictive material and with similar arrangement (see figure 1a)

Regarding claim 10, the permanent magnet can be single magnet.

Regarding claim 13, Garshelis teaches the use of first and second permanent magnet poles (see for example, the left side of figure 3).

*Response to Amendment*

3. Applicant's amendment and arguments filed 11/10/03 have been fully considered but they are moot in view of the new ground of rejection. It appears the cited art teaches the main aspect of the invention, i.e., a magnetostrictive shaft with pair of permanent magnet for detecting flex upon the exertion of torque.

4. THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire THREE MONTHS from the date of this action. In the event a first response is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (571) 272-2185. The examiner can normally be reached on Tuesday-Friday from 8:00 AM to 6:00 PM.
